Mandatory reporting of adverse events

Serious adverse events with this product must be reported to Dräger and the responsible authorities.

Strictly follow these instructions for use

WARNING

To maintain patient safety, adhere to all **WARNINGS** and **CAUTIONS** on equipment labels or appearing in the Instructions for use for the Infinity Acute Care System (IACS) applications.

CAUTION

Read all cleaning instructions (for example, originating from the disinfectant manufacturer and the hospital) carefully *before* cleaning the device. Refer to the chapter entitled “Reprocessing” for device-specific cleaning instructions in the Infinity Acute Care System M540 Instructions for use.

General precaution

CAUTION

Even accessories designed to be reused have a limited maximum period of use. Handling and reprocessing can increase wear and markedly shorten maximum period of use (e.g., disinfectant residues can attack the material more intensely during autoclaving). If signs of wear become visible, such as cracks, deformation, discoloration, peeling, etc., affected accessories must be replaced.

Training

Training for users is available via the Dräger organization responsible (see www.draeger.com).

Sterile accessories

CAUTION

Risk of medical device failure and of patient injury.

Do not use sterile-packaged accessories if the packaging has been opened, is damaged or if there are other signs of non-sterility. Single-use accessories must not be reused, reprocessed, or re-sterilized.

Availability of accessories

Some articles are not available worldwide because they are not approved in all countries.

Technical documentation is available on request.

WARNING

Risk due to incompatible accessories

Dräger has tested only the compatibility of accessories listed in the current list of accessories. If other, incompatible accessories are used, there is a risk of patient injury due to medical device failure.

Dräger recommends that the medical device is only used together with accessories listed in the current list of accessories.

Connected devices

WARNING

Risk of electric shock and of device malfunction

Any connected devices or device combinations not complying with the requirements mentioned in these instructions for use can compromise the functional integrity of the medical device and lead to an electric shock. Before operating the medical device, strictly comply with the instructions for use of all connected devices or device combinations.

Installing accessories

CAUTION

Risk of device failure

Install accessories to the basic device in accordance with the instructions for use of the basic device. Make sure that there is a safe connection to the basic device.

CAUTION

Risk of incorrect use

The accessories are not available individually. Only one copy of the instructions for use is included in the bulk package and must therefore be kept in a location accessible for users.

On the following pages, each parameter section includes a diagram depicting parameter-specific accessories, along with one or more tables displaying accessory names and part numbers. The letters displayed in the diagrams correspond to the letters in the tables. Because some accessories are too numerous to list in the diagram, they do not have a letter associated with them.

Part numbers are subject to change without prior notice. Contact a Dräger representative for the most current part numbers.

Failure to use Dräger-approved accessories may compromise the functional integrity of the IACS.
